

*Cyber Security of Industrial Facilities  
is IOTSA's Objective*

## About IOTSA

IOTSA is a global community of interest which promotes the need for greater collaboration, education and understanding on matters relating to Operational Technology Security and the expanding threat landscape.

IOTSA is a Not-For-Profit entity and works with like-minded partners from the public and private sectors to reduce the risk of a significant compromise of our Operational Technology, ICS, SCADA, IT and IoT environments.

# Securing the Future of Our Industrialized World

## Foundation of IOTSA

**01.**

Cybersecurity is a critical factor for the success of our industrial operations – especially with the aggressive development of IIoT and IoT

**02.**

The cyber domain of our industrial facilities continues to be a target of the attackers – consider Stuxnet, Trisis/Triton

**03.**

There is an imperative need to increase the quality and quantity of trained Industrial Cyber Security Professionals

**04.**

The global regulatory environment is rapidly changing – the EU NIS, GDPR, US NERC CIP requirements.

**05.**

IOTSA can bring together the world's OT cybersecurity leaders

**A PROFESSIONAL  
ORGANISATION  
FOR INDUSTRIAL  
CYBER SECURITY  
PROFESSIONALS**

**ICS – SCADA - IoT**

**International  
Operational Technology  
Security Association**

*Power Plant and Maritime Cyber includes OT/IloT/IoT*

## Our Key Principles

IOTSA believes cybersecurity of the industrial network belongs to BOTH IT and OT

---

IOTSA stands by the belief that security of OT systems is an operational imperative throughout the physical and digital supply chain

---

IOTSA will serve as a trusted partner for industries, regulators and individual security practitioners

---

IOTSA will continuously offer timely education, training and resources for members and regulators. We will support other school criteria such as degree courses in universities, professional education and technical training, etc

---

We will participate in industrial cyber and physical security forums and networks globally to educate and promote the need for increased OT security training and awareness

---

IOTSA will promote and partner with international vendors and trade associations to aid in global promotion and awareness of IOTSA and our messages

---

IOTSA will be the trusted "go-to" resource for global entities regarding OT, IoT and IIoT security knowledge, perspective and expert opinion

*Renewable Energy requires ICS Cyber Security*

*Protecting Critical National Infrastructures (CNI)*

### Membership

Membership is open to industry professionals.

Join the team today

[www.iotsa.info/membership](http://www.iotsa.info/membership)

### Sponsorship

IOTSA offers multiple opportunities for engaging with our membership and to become an influential partner to the IOTSA objectives. We offer a number of sponsorship packages to meet budget availability
